

FP 2 Guide Profile Set, GP 2 Glide Profile

- For conveyor unit self-assembly
- For use in conjunction with ST 2/C-... section profiles, AS 2/C-... drive modules and UM 2/C-...

- FP 2 guide profile for laterally guiding the workpiece pallet; slides onto the SP 2/C-100 section profile
- GP 2 glide profile for guiding the top flat chain; slides onto the SP 2/C-100 section profile

Product description

The guide profile is used for lateral guidance of the workpiece pallet. The glide profile is used to guide the accumulation roller chain. Both profiles are pushed onto the section profile. Additional blocking bolts prevent the glide profiles from moving in a longitudinal direction.

Technical data

No.			3842529933
ESD			yes
Max. operating temperature	T	°C	+40
Material entry			Guide profile: plastic, PA (suitable for use in an EPA) Glide profile: plastic, PA (suitable for use in an EPA)
Length	l	mm	6,000
