

**3001 12GEFDBA032-AA**

- Bore size : 12"(300mm)
- Flange: PN10
- Body material: Ductile iron
- Shaft material: Stainless steel
- Rotor material: Bronze
- Maximum working pressure: 10 bar (145psi)
- Maximum temperature of fluid: 100°C (212°F)
- Valve weight: 295kg

**Actuator (electric)**

- Material: Cast aluminum base, steel cover and two part polyurethane paint finish, waterproof to IP65
- 1/4 turn
- Adjustable end stop
- Manual hand wheel standard
- Local position indicator
- Limit switch
- Thermal cut out in motor
- Power supply: AC220V
- Conduit thread: M25X1.5
- Motor input power: 200W
- Running current: 0.55 A
- Starting current: 0.92 A

**Application information**

- Fluid: Fresh water
- Max working pressure: 10 bar
- Operation model: Electric action, port 3 to 2
- Located: Engine room
