

F1300N

Rotary Table

Specially designed for tackling circular dispense applications, the Fisnar F1300N rotary table delivers a highly effective method of dispensing circular patterns on areas that are typically difficult to access.

The Z-axis tilt on the rotary table enables controlled rotary dispensing at an angle, providing the optimum positioning for the dispense tip.

Easily adjusted, the rotary table can dispense either on a horizontal or vertical wall within a component part or on an outside wall.

Features:

- Adjustable Z-axis including tilt control
- Variable speed table.
- Simple to set up and operate.
- Fully programmable for perfect dispensing.
- Fluid purge button.
