

Datasheet

Earth Leakage Monitoring Iso-4

- 1 - 4 channels supervision
- DIN 96 panel mounting
- LED display
- Graded 0-9999 mA Trms
- Warning and Alarm
- Programmable time delay
- Digital outputs for Warning and Alarm
- RS-485 Modbus RTU
- Filter function as option

ISO-4 is a user friendly earth fault monitoring instrument for up to 4 channels.

Two individually programmable digital outputs for Warning and Alarm . The 4 displays can be On or Off depending on how many channels are in use.

The instrument has a reset button for alarm acknowledgment and will show the monitored earth fault in mA.

ISO-4 is suitable for measuring earth fault far out in the facility.

Technical data

Article numbers	670104 670103 with filter
Power supply:	85-230 VAC max. 7 VA
Max. input current:	Maximum time w/ AC < 200 A unlimited < 500 A 40 sekunder < 1000 A 5 sekunder
Connections:	Plinth, max. 2,5 mm ²
Cycle time:	1 sek
Digital outputs:	Max 150 mA, 12-230VAC/DC
Dimensions:	B x H x D 96 x 96 x 95 mm
Weight:	500 g
