

Diaphragm Valve, Plastic

Construction

The GEMÜ R690 diaphragm valve has a low maintenance membrane actuator which can be controlled by air or inert gases. Normally Closed (NC), Normally Open (NO) and Double Acting (DA) control functions are available. All medium wetted parts and the actuator housing are made of high-grade plastic materials which can be selected to suit the application.

Features

- Suitable for inert and corrosive* liquid and gaseous media
- Insensitive to particulate media
- Optional flow direction and mounting position
- Nominal pressure PN 10 / 150 PSI
- Nominal size DN 15 - DN 100 / NPS 1/2" - NPS 4"
- Actuator housing in glass fibre reinforced PP
- Valve body and diaphragm available in various materials and designs

Advantages

- Compact, lightweight construction and high performance
- Good flow characteristics due to flow optimized valve body
- Proven long-life membrane actuator
- Leak detection hole
- Diaphragm easy to replace
- Adjusted instrumentation
- Optical position indicator as standard
- Optional accessories
 - Electrical position indicator with microswitches or proximity switches
 - Positioner and process controller
 - Stroke limiter
 - Pilot valve

*see information on working medium on page 2

Sectional drawing

Technical data

Working medium

Corrosive, inert, gaseous and liquid media which have no negative impact on the physical and chemical properties of the body and diaphragm material.

Working medium temperature

Valve body PVC-U	10 to 60 °C
Valve body ABS	-10 to 60 °C
Valve body PP / PP-H	5 to 80 °C
Valve body PVDF	-10 to 80 °C

The permissible operating pressure depends on the working medium temperature.

Ambient temperature

Valve body PVC-U	10 to 50 °C
Valve body ABS	-10 to 50 °C
Valve body PP / PP-H	5 - to 50 °C
Valve body PVDF	-10 - to 50 °C

Control medium

Inert gases

Max. perm. temperature of control medium 40 °C

Filling volume (control function 1):

Diaphragm size 20	0.10 dm ³
Diaphragm size 25	0.20 dm ³
Diaphragm size 40	0.55 dm ³
Diaphragm size 50	1.06 dm ³
Diaphragm size 80	2.50 dm ³
Diaphragm size 100	2.50 dm ³

Other combinations on request	

Kv value

MG	DN	[m ³ /h]
20	15	6
	20	10
	25	12
25	32	20
	40	42
40	50	46
	65	70
50	80	120
	100	189

Kv values determined acc. to DIN EN 60534, inlet pressure 5 bar, Δp 1 bar, PVC-U valve body and soft elastomer diaphragm. The Kv values for other product configurations (e.g. other diaphragm or body materials) may differ. In general, all diaphragms are subject to the influences of pressure, temperature, the process and their tightening torques. Therefore the Kv values may exceed the tolerance limits of the standard.

MG = diaphragm size

The Kv value curve (Kv value dependent on valve stroke) can vary depending on the diaphragm material and duration of use.

* Actuator sizes _DL, _DM with a lower force spring package to extend diaphragm life and for vacuum applications.
 All pressures are gauge pressures. Operating pressure values were determined with static operating pressure applied on one side of a closed valve. Sealing at the valve seat and atmospheric sealing is ensured for the given values. Information on operating pressures applied on both sides and for high purity media on request.

*For required control pressure depending on operating pressure see diagram.
 All pressures are gauge pressures. Operating pressure values were determined with static operating pressure applied on one side of a closed valve. Sealing at the valve seat and atmospheric sealing is ensured for the given values. Information on operating pressures applied on both sides and for high purity media on request.
 MG = diaphragm size

Technical data

Control pressure characteristic DN 15 - 100 (EPDM, FPM)

The control pressure depending on the prevailing operating pressure, as shown in the diagram, is intended as a guide for operating the system with low wear on the diaphragm.
